a dual-monitor setup is highly recommended.

## LET'S COVER The BASICS

Photoshop Overview: Familiarize yourself with the workspace, toolbars, and essential functions.

File Setup: Learn the difference between print and web setups, resolution settings, and basic color profiles.

DPI: More in depth understanding of file quality and resolution. 300, 150 & 72 DPI.

Layers: Introduction to layers, layer styles, naming and grouping layers.

Masking Images: Techniques for hiding or revealing parts of images.

Masking Out or Isolating Images: Techniques for removing backgrounds from design elements and images. Select and Mask tool, Pen Tool, Magic wand tool. + New AI tools to speend up this process and accelerate your creativity

*Here, we start with a VISION. Photoshop Mastery is where you learn to slow down and build the skills to bring that vision into form, with patience, not pressure. We connect to the process of creativity itself, not just the outcome, and along the way you'll discover different ways to tap into your own creative flow. This is skill building as a relationship, not a race.*
